SUN BEAMS

By WALTER M. BARRETT

Day after tomorrow will mark the opening of the trout fishing season along the Truckee river. For six months nimrods, both good, fair and indifferent, will find pleasure in taking thousands of trout out of the stream. If fishing brings business to Truckee, and there seems little quest ion on this score, then a thought should be given to replacing those fish next fall. Just keep it in mind as someone will "be seein' you one of these days to ask your support in the restocking program.

Didn't we tell you the high school thespians would give a good night's entertainment with "The Patsy." Those of you who saw the play last Friday night will agree that for once, at least, we were right. The youngsters are certainly entitled to a lot of credit.

Now that the prediction turned out satisfactorily, we want to prophesy that the Knights of Pythias' dance at Masonic hall Saturday night will be a really enjoyable affair. The committeemen have spared no effort to provide the best in entertainment and a large crowd is anticipated to participate in the affair.

Maybe you have noticed the increasing number of beggars about town recently. It just appears to us that with the many so-called relief programs, designed to cloth, feed and house, in a manner befitting the country, one-third of a nation, that something has gone amiss. We were almost startled last week to be visited by two children, neither over six or seven years of age and on two different occasions, begging money with pathetic notes written by fond parents. Another mild shock was occasioned by the appeal of a middle aged woman soliciting nickles and dimes to aid her in her asserted difficulty.

With the advent of spring (we hope), the hustle and bustle in the Lake Tahoe district is a long step from conditions there six weeks or so ago where the lake area was in the cold grip of winter. Now many new homes, all of major proportions, are being erected, new businesses are opening up and the lake is taking on an atmosphere of real boom days. Again we predict that the 1937 season will see more activity in the Tahoe-Truckee districts than ever before.

A program of no little importance including a talk by a prominent educator from Sacramento, will be presented this evening at the grammar scool auditorium in commemoration of the 18th annual observance of Public Schools Week. All parents and others interested in the future welfare of the nation and democracy should by all means attend this program. It will prove not only entertaining, but highly educational.

But to get back to our favorite subject. Have you bought your fishing license, checked your equipment and procured your bait for the big opening? Neither have we, but just the same we'll be seeing you out there bright and early Saturday.

REBEKAH LODGE FETES MEMBERS OF HOBART MILLS

Members from Hobart Mills who will soon be leaving this vicinity were feted by Naomi Rebekah Lodge No. 2, on Wednesday evening.

Refreshments were served at the close of the affair, cards having occupied the group during the earlier hours of the evening.

High score awards went to Mrs. Dan Smith and George Andrich and the consolation token were presented to Mrs. Hannah Stewart.

WARNING FOR FIRE PERMITS ISSUED BY FORESTER HERE

Hobart Snider, local forest ranger, announced Wednesday that fishermen should not forget to apply for camp fire permits at the office of the forest service, as they are required by law.

Recalling a camp fire that got out of control near the edge of the river last May, landowners have requested the forestry service to be on the lookout for fire builders in the vicinity of the river.

The camp grounds at Farad and Boca are the only places where the fires will be permitted, Snider said, and on Thursday members of the department were busy putting in order and installing a system of good spring water for the use of the campers who are bent on hooking the wary trout.

Checking Station Men Get Credit for Capture Of Swindlers

Charged with bilking a Reno colored woman out of $135, Alfred Johnson, 46, and his wife, Edna, 29, both negros from Cornith, Miss., were apprehended here last week by local officers and returned to the Nevada city.

A description of the pair was received over the teletype system and Chief Clerk Carl Smith of the local checking station and Deputy Sheriff Tom Dolley prepared a trap for the couple and when they arrived they were taken into custody. A change of clothes between here and Reno failed to disguise the Johnsons, but a thorough search failed to reveal the money. Officers accompanied by the alleged victim came from Reno and the Johnsons were identified.

After reaching Reno, another close search disclosed the money hidden on the woman and the two pleaded guilty to the charge of obtaining money under false pretenses.

Missouri Moves To California In Huge Drove

When Missouri moves to California it comes in bunches, as the boys at the state checking station will testify.

Typical of the influx of the "show me" visitors, was the truck load of "kin folks" which arrived at the checking station last Friday. Chief Clerk Carl Smith and Assistant Sarge Clark were on duty when the truck, operated by Denver Hollers of Blue Eye, Missouri, and loaded with 11 members of the family pulled into the station.

Every member of the group was a husky "son of the soil" and while they protested that after a brief visit with relatives in Oroville and Long Beach, they were returning to their native state, checking station officers cast doubt on the assertion, predicting that the "kin folks" were looking forward to the splendid opportunities for work or farm settlement possibilities in California. .....

ANNUAL MEETING OF HIGH SCHOOL BODY SET FOR SATURDAY

The annual high school board meeting is scheduled to be held at the Meadow Lake Union high school on Saturday evening at 8 o'clock.

Formerly the meeting was held during the first part of May for the organization of the board, following the election of new members in March, but at the present time the election of new members has been changed to June, probably necessitating a later meeting for this purpose.

The meeting Saturday may be devoted to the discussion of employment of teachers for the coming year according to the annual custom.

FISH LICENSE SALES EXPECTED TO SET RECORD THIS YEAR

SACRAMENTO, April 29.—(UP)—Sales of fishing licenses in 1936 totaled 298,674 and returned $608,575 in revenues, the state fish and game division reported.

The total for last year exceeded 1930, second largest sales volume year in the hisory of the state, by 50,355 permits.

Although indications point to a late trout season this year, hampered by tardy spring weather, license bureau attaches believe total permits for 1937 will set a new record, going well above 300,000.

PROSPECTS GOOD FOR OPENING DAY OF TROUT SEASON

River May Be High but Bait Fishing Expected To be Good

FLY CASTING POSSIBLE

Most Streams Still Not Good As Saturday Marks Opening Day

While fishing conditions in many parts of the state are still far from agreeable and offer little encouragefor fishermen, the Truckee river and adjacent streams and lakes are reported to be in good shape and old timers predict that the opening of the season Saturday should see scores of limits brought into Truckee from the river and tributaries.

Bait fishing will predominate for the week end opening, as the water is a bit high and muddy for good fly casting.

However, the stream farther up toward Tahoe is clear and with a "break" from the weather man there will be some good casting prospects, according to those familiar with the river.

Thousands of fish planted in the stream last fall by the San Francisco Fly Casting Club, through the cooperation of Truckee residents, must be replaced this fall by more and committeemen are already busy preparing to raise the necessary fund to provide for the feeding and caring for the fry after they are turned over to the club for rearing.

PUBLIC SCHOOLS WEEK

It is the hope of every man that the world of tomorrow will be a better world—that there will be less of storm and stress and suffering, and more of peace and good will and happiness.

But where can men place this hope, ever thwarted by the failing and weaknesess of the human race? There is only one answer. That place is in the schools. For the future of human kind is shaped in the schools, and if ever the eternal problems are solved, it will be only because the schools have made better men of future generations than we ourselves have been.

The idea of holding the "wee' was born in California in today, plodding on throughout the year unaware of the future's birth, are given this week to be made aware, to visit the schools and see and hear of their progress.

The idea of holding the "week" was born in Califronia in 1920, when post-war indifferences toward education was threatening to bog down the whole system. So successful was this observance in arousing new interest, that the nation later followed California's example, setting up Education Week to be observed in the fall.

Californiastill leads in the matter of education. Our schools are second to none anywhere. But to keep them that way we must all understand and share the problems in the work of building better men for the world of tomorrow.

THE CORONATION

Lord Marlew, the British peer now visiting California, advises staying away from the much-ballyhooed and long awaited coronation of King George VI, "because I don't want to see my American friends exploited."

This from a Britisher, is sheer sacrilege. That all the regal pageantry could be mere window-dressing for tawdry commercialism at the core, that this rite steeped in the tradition of centuries could be just a big show run for profit-why, the very thought is appalling. Appalling—yes, definitely, as most Britishers would say.

Yet the idea will startle few Americans. We're wise to the British way of doing practical things under the guise of "tradition" and "form" and other ancient titles. And besides what's wrong with a show for a profit? In America we hold world fairs and frankly admit that the underlying purpose is commercial—with a lot of fun on the side.

Actually, however, profit-taking is only a close second among the practical reasons for the lavish pomp and ceremony of the coronation.

First and above all is a reason only indirectly commercial, that of dramatizing royalty and keeping the crown the symbol of the unity of the peoples of the British Empire. Holding the empire together is vital to the economic survival of England, to her commerce and thus, of course, to her profit-taking.

But Lord Marley's advice won't frighten away many Americans. A little exploiting of those who can afford to go won't matter much. Americans love a big show, and they go expecting to be fleeced, anyway.

Who can tell me where Jeanette moved to?
I wonder whether Edna said Yes to John?
I wonder if Aunt Martha is feeling better?
Wouldn't it be nice to talk with Mother and Dad?
I wonder whether the Taylors remodelled their house?

Politically Speaking

By GEORGE E. HELMER
(United Press Staff Correspondent)

SACRAMENTO, April 29.—(UP)—The labor situation in California in the opinion of state legislators, is so "hot" that one delay after another has featured efforts to push labor relations board measures through the lawmaking machinery.

The senate labor and capital committee has had the Yorty "little Wagser act" bill on its file for weeks and scheduled if for hearing two or three times but some committee members admitted it was such a hot subject that they openly dodged it as long as possible.

When a brief hearing finally was held, no action was taken. A week's delay was agreed upon, despite Gov. Frank F. Merriam's plea to legislators to act swiftly on some sort of measure to set up a labor relations board as a means of helping alleviate strike trouble.

Assembly passage of a bill to trim the state's sales tax from 3 cents to 2½ cents came as no surprise to political observers. The close vote, however (41-31), was unexpected.

Some of the assemblymen who voted for the decrease did so because they felt confident the bill would be defeated in the senate.

Tasmanian

The Hon. A. G. Ogilvie, premier of the island of Tasmania, who visited the West Coast recently en route to the coronation ceremonies in England.

When the next election campaign rolls around, they can go to their constituents and say. "Look, I tried to reduce taxes last session. It wasn't my fault that the bill was stopped in the senate."

Even if the same attitude should influence the senate to pass the bill, a development which would amaze almost everybody, there was the governor's veto to halt any movement which would knock at least $30,000,000 off the state's biennial income. And it was extremely doubtful whether a two-thirds majority could be mustered to pass such a bill over the governor's veto.

California's treasury is in good shape, and the general fund will be out of the red within the next year if taxes are left alone, officials figured. While some reduction, such as that which would follow the exemption of restaurant meals from state sales tax, may be granted, there was little belief the senate and governor would approve anything that would lessen materially the chances of balancing the budget and retiring a $20,000,000 deficit.

Assemblyman C. C. Cottrell batted .333 in his dirve to put a trio of anti-gambling bills onto the legislative floor for consideration. He managed to win committee approval of his bill which would require peace officers to destroy slot machines, but he ran into insurmountable obstacles when he asked, also, for support of bills permitting the abatement of establishments housing gambling devices and listing as illegal any kind of mechanical contrivance or gambling game in which skill played only a minor part.

Debate on the bills resulted in a sharp exchange of words between two of the veteran legislators—Cottrell, author of the bills, and Assemblyman Charles Lyon, one of the old heads who until democrats gained control of the lower house ruled as one of the major whips.

Cottrell accused Lyon of being in league with the gambling interests, and Lyon charged Cottrell with "talking for publicity purposes."

The H. and W. Club of Meeks Bay and vicinity held its last regular meeting of the spring season on last Wednesday evening, recessing until the first week in October. At that time the club will resume its social and philanthropic activities on a larger scale than heretofore.

At this week's meeting, a building fund was set aside to be added to from various sources until sufficient can be saved for the club to erect a building of its own.

Birthdays of two members, Captain Hans Hansen and Canton Iverson of Rubicon Lodge. Both received gifts from the club. The latter part of the evening was spent in playing Bingo. The winners were Mrs. A. M. Henry of Tahoe City and Phillip Gier of Meek's Bay. The consolation token went to Mrs. Jack Hale and Charles Heller both of Meek's Bay.

At the close of the evening Mrs. Pearl Heller read, in honor of the last gathering of the members for the summer, a verse of her own composition.

Mr. and Mrs. Harry Walker of Rubicon Park left this week for an extended auto trip. They will tour Oregon, Montana and Idaho before motoring to Kansas where they will visit relatives in Walker's former home.

"POOR TO FAIR" IS PREDICTED FOR FISH ON FIRST DAY

SACRAMENTO, April 29.—(UP)—California sportsmen will have to wait a little longer this year to get their "limit" of trout, according to reports of game wardens throughout the state.

"Predicting opening day conditions state fish and game wardens this month almost unanimously agreed that trout angling will only be "poor to fair' for those who salute the 1937 season with rod and reel on the morning of May 1," a report of the state department of natural resources said.

In most trout fishing areas the streams are high and muddy, roads are blocked, lakes still frozen over or snow packs undiminished. Only seven of California's many trout counties forecast good fishing for the opening day.

If housewives cooked with Motor Oil

their first choice would be

CYCOL

It's too bad you can't see in your frying pan the sludge some oils leave in your heated engine. If you could you would never use anything but Cycol. For Cycol forms *less* carbon than *any other motor oil.*

No hard carbon to wear metal surfaces, no sludge to gum piston rings and slow down your motor. Cycol keeps rings clean and free, keeps cylinder walls smooth and bright.

No other motor oil offers these three outstanding advantages: Cycol forms less carbon, offers less oil drag and Cycol *will not* corrode modern bearings. Yet Cycol sells for only 25c a quart in refinery sealed cans. Switch to Cycol today and stay with it.

MECHANICS, AUTO DEALERS

SEE THIS TEST!

See with your own eyes this amazing PROOF of Cycol's superiority. Along with competitive oils, Cycol is dropped on a heated test plate to determine the degree of carbon formation. Cycol—*this test indisputably proves*—forms less carbon than other leading brands of motor oil.

Arrange with your local Associated office to see this demonstration made.

SKI CLUB'S PARTY AT TAHOE DRAWS BIG ATTENDANCE

TAHOE CITY, April 29.— The Tahoe Ski Club party in the local school auditorium was well attended. WE'RE HARD TO FIT — but

the FORD V-8 suits us!

They say you can't have everything—*but this new Ford V-8 says differently.*

At the lowest Ford price in years, you can have the roominess and comfort possible only with an engine that's extra *short*, a springbase that's extra *long*, drivers' seats that adjust *two* ways.

And—you ride where riding comfort is at its best—amidships, *between* the axles.

You get brakes that stop with tremendous power—at the gentlest of toe pressure.

You get a car that's easy to steer, easy to park. Yet the way it hugs the road and cradles you over rough spots reminds you of great big cars, with great big price tags.

You get modern lines and sparkling colors, and up-to-the-minute "little things," too—battery under the engine hood, starter button on the dash and parking brake below it, big luggage compartments on all sedans.

And anywhere you go, you know you'll find good service at costs so low they're famous the world around.

So no matter how hard you are to please or fit—no matter how much you expect for your money—here's the car to see FIRST. The QUALITY car in the low-price field.

assembly refused to withdraw from committee a bill to repeal the state criminal syndicalism act.

Discussion and the vote on this showed conclusively that the democratic bloc was not sticking together on controversial questions that have no particular bearing on the party and its program.

Demochat Paul Richie, a champion of labor and the "downtrodden", introduced the anti-criminal syndicalism bill which was tabled by the crime problems committee. When he asked the lower house to pull the bill out of committee, he was

One surprise developed when the repulsed, 45 to 29.

This meant the latest drive to repeal the act which prohibits anyone from teaching or advocating the forcible overthrow of government had failed. There was no indication whether an attempt would be made to renew the fight later in the session.

Richie's attempt to win legislative support for his drive to free Tom Mooney reached its final point when after failing to put two resolutions through both houses because of senate opposition, he confined himself to a simple assembly resolution asking the governor to pardon Mooney.

This was done, Richie explained, to put the lower house on record as favoring the release of the convicted San Francisco Preparedness Day bomber. There was little or no belief that the governor would do more than glanse at the document.

WOMEN ANGLERS GIVEN BREAK BY EXPERT OF WASHINGTON BUREAU

Apropos of the approach of the opening of fishing season comes word breathlessly awaited for many years by wives of anglers from Talbott Denmeal of the bureau of fisheries at Washington, who recently announced that "the finny tribe is sensitive to vibrations but talking does not reach them. As long as the little woman does't stomp on the bank or dance a jig on the bottom of the boat, fish are not likely to know she is there."

The piscatorial expert who would, if he ran for any office, swing the feminine vote, went on to state that husbands had for years excluded wives from fishing trips because of the alleged sensitiveness of the fish to the woman's chatter, scaring them from the bait.

"It's the bunk—fish have no external ears and cannot hear most sounds made outside the water," he explained.

Wiring which was safe five years ago may not be safe today—due to the ever increasing use that is being made each year.

It cost you nothing to satisfy yourself that your wiring is safe.
